Reviews of the Advanced Book of Cross Stitch (The Cross Stitch Collection) by Angela Beazley

Cildorais

Angela Beazley has written a couple other books on cross stitch but you might best recognize her maps that she's famous for such as England, highlighting important sites or with cathedrals as well as Wales, Scotland, Ireland, The World. I have the one of England and want to finish it sometime in honor of my English husband.

This book has some truly remarkable designs. The first is a little brooch that looks like a painted

miniature. Others are flowers stitched in the amazing ways: beading, ribbon work, long straight stitch, French knots...the Garden Gate pattern is intense and highly detailed. There's even a card with what looks like a realistic waterfall.

My favorite though is the Tudor House which has 24 different diaper patterns and uses about 40 different colors of DMC flower thread. These projects will expand your repertoire beyond just cross stitch in a manageable way.

Nern

Good selection. I like the book and will keep it in my library of resource books.
